Topics of the guideline	Develops a disability perspective on mobility and transport in the context of urban transport	
Description of the guideline	<p>The broader transport and environment debate uses concepts such as "access" and "mobility" referring to the general population's access to different activities and mobility. EDF urges the European Union to fully include disability perspective on access and mobility in the concepts used in the general transport debates. This paper develops this further in the context of urban transport.</p> <p>Content:</p> <ul style="list-style-type: none"> - People in cities - Urban Transport and the environment - Urban transport and the economy - Success Stories - showing that the problem can be tackled - Solutions and implementation - visions for the future - Solutions and implementation - the "seamless journey" - Economic instruments - Solutions and implementation - new ways of working - Where can we go from here
