Fact Sheet ISEMOA Task 2.3

State of the art regarding guidance-materials on accessibility

ISEMOA Partner Contributing the Information	Technische Universität Dresden			
Title in Original Language	Akkustische Signale im öffentlichen Bereich - Anforderungen			
Title in English	Acoustic Signals in Public Traffic Areas - Requirements			
Year	2000			
Initiator	DIN Deutsches Institut für Normung (German Institute of Normation DIN)			
Author / Editor of Guideline	Arbeitsausschuss F4 „Kommunikationshilfen für sensorisch Behinderte“ (Work group "Communication Aids for Sensory Impaired")			
Supporting Parties				
Guidance developed by (one pick only)	☐ Administration / Political actor	☐ PRM lobby group	☒ Organization	☐ Operator
Type of Document (one pick only)	☒ Book	☐ Website	☐ Article	☐ Magazine
	☐ Leaflet	☐ Flyer	☐ *.doc	☐ *.pdf
Link, ISBN, ISSN, Bibliographical Data (one pick only)	☐ Link	☐ ISBN	☐ ISSN	☒ Bibliographical data

	Deutsches Institut für Normung: DIN 32974 - Akkustische Signale im öffentlichen Bereich. Anforderungen. Berlin, February 2000.

Developed in	Germany			
To Be Applied in	Germany			
Language	German			
Kind of Paper (one pick only)	☐ Strategy paper	☐ Policy paper	☐ QM process	☒ Technical standard
	☐ Other:			
Target Area (you can pick both)	☒ Urban		☒ Rural	
Dedicated to (you can pick more than one)	☐ Local / Regional administration	☒ Designers / technicians	☐ Operators	☐ PRM
Type of PRM Affected (you can pick more than one)	☒ Visual impaired	☐ Motor impaired	☐ Hearing impaired	☐ Cognitive / Learning impaired
Application Field (you can pick both)	☒ Public Transport		☒ Public Space	
Approach (you can pick more than one)	☒ Engineering, design, technology, planning	☐ Financial support, funding	☐ Organisational / operational support	☐ Awareness building, education

Are Standards Provided?	☒ Yes	☐ No	
If yes - Please Describe (e.g. footpath width, gradients etc.)	Signal and cycle frequency; sound pressure level and time to emit of door closing and door guidance signals; warning signals for entry devices, closed gates and bridges; use of door emergency buttons, announcing sounds, and confirmation sounds of use of stop-buttons in vehicles		
Topics of the guideline	Standards for acoustic signals in public traffic areas		
Description of the guideline	This norm deals with acoustic signals in vehicles of public transport and public space. It defines standards for acoustic signals to initiate distinct associations towards the actions after the signal and avoid the confusion with other acoustic signals. This helps especially blind and visual impaired but other groups as well to orientate themselves in public spaces.		
Execution (one pick only)	☒ Advisory	☐ Partly mandatory	☐ Mandatory (Legally binding)
Any More Comment?
