

Fact Sheet ISEMOA Task 2.3

State of the art regarding guidance-materials on accessibility

ISEMOA Partner Contributing the Information	Technische Universität Dresden			
Title in Original Language	Bodenindikatoren im öffentlichen Raum			
Title in English	Ground Surface Indicators in Public Areas			
Year	2010			
Initiator	DIN Deutsches Institut für Normung (German Institute of Normation DIN)			
Author / Editor of Guideline	Normausschuss 63-06-04 AA "Kommunikationshilfen für Blinde und Sehbehinderte" (Norm Commission "Communication Aids for Blind and Visually Impaired")			
Supporting Parties				
Guidance developed by (one pick only)	<input type="checkbox"/> Administration / Political actor	<input type="checkbox"/> PRM lobby group	<input checked="" type="checkbox"/> Organization	<input type="checkbox"/> Operator
Type of Document (one pick only)	<input checked="" type="checkbox"/> Book	<input type="checkbox"/> Website	<input type="checkbox"/> Article	<input type="checkbox"/> Magazine

Developed in	Germany			
To Be Applied in	Germany			
Language	German			
Kind of Paper (one pick only)	<input type="checkbox"/> Strategy paper	<input type="checkbox"/> Policy paper	<input type="checkbox"/> QM process	<input checked="" type="checkbox"/> Technical standard
	<input type="checkbox"/> Other:			
Target Area (you can pick both)	<input checked="" type="checkbox"/> Urban		<input checked="" type="checkbox"/> Rural	
Dedicated to (you can pick more than one)	<input checked="" type="checkbox"/> Local / Regional administration	<input checked="" type="checkbox"/> Designers / technicians	<input type="checkbox"/> Operators	<input type="checkbox"/> PRM
Type of PRM Affected (you can pick more than one)	<input checked="" type="checkbox"/> Visual impaired	<input type="checkbox"/> Motor impaired	<input type="checkbox"/> Hearing impaired	<input type="checkbox"/> Cognitive / Learning impaired
Application Field (you can pick both)	<input checked="" type="checkbox"/> Public Transport		<input checked="" type="checkbox"/> Public Space	
Approach (you can pick more than one)	<input checked="" type="checkbox"/> Engineering, design, technology, planning	<input type="checkbox"/> Financial support, funding	<input type="checkbox"/> Organisational / operational support	<input type="checkbox"/> Awareness building, education

Are Standards Provided?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
If yes - Please Describe (e.g. footpath width, gradients etc.)	Surface structures, recognizability, laying, materials, and bordering strips of floor indicators; use of floor indicators in public space and in buildings		
Topics of the guideline	Use and measures of floor indicators in- and outside of buildings		
Description of the guideline	<p>In public spaces with missing space borders, high noise levels, danger zones or soundless orientation marks aside, blind and visual impaired are helpless without a orientation system and excluded from a participation in society on their own. By the use of uniform orientation assistance not depending on the visual capacity, unambiguous signals can be given for blind and visual impaired people and reduce possible orientation problems.</p> <p>Tactile information is an orientation assistance for blind people in some cases if they can be recognized by groping and interpreted accordingly. By use of a necessary light density contrast, tactile orientation assistance is useful for visual impaired, too.</p> <p>Precondition for an effective benefit of an orientation assistance for blind and visually impaired people is a repeating classification scheme with always the same meaning. This leads to a constant orientation assistance for the persons concerned.</p>		
Execution (one pick only)	<input checked="" type="checkbox"/> Advisory	<input type="checkbox"/> Partly mandatory	<input type="checkbox"/> Mandatory (Legally binding)
Any More Comment?
