Topics of the guideline	A web-based tool on accessibility of major public buildings			
Description of the guideline	Main aim of the research project is development of a new web-based tool (geographical information system - GIS database) on accessibility of major public buildings. It will enable constant monitoring and supervision of the consistent compliance with the required standards and practical examples of measures to overcome most common barriers. The tool will be designed to give detailed information on access to specific public buildings for disabled. On the other hand it will be an efficient system of monitoring, control and urgent mechanisms for local and regional administration.
